Title: Still Alive

Alternate title:

Lyrics:

V1 This was a triumph
I'm making a note here
'Huge Success'
It's hard to overstate my satisfaction

V2 I'm not even angry
I'm being so sincere right now
Even though you broke my heart and killed me
And tore me to pieces

V2 And threw every piece into a fire
As they burned it hurt because
I was so happy for you

V3 And these points of data make a beautiful line
and we're out of Beta we're releasing on time
So I'm glad I got burned think of all the things we learned
for the people who are still alive

V4 Aperture science
we do what we must because we can
It's for the good of all of us
Except the ones who are dead

V4 But there's no point crying over every mistake
you just keep on trying till you run out of cake
and the science gets done and you make a neat gun
for the people who are still alive

Verse order: V1 V4 V2 V3 V5 E1 V1 V4 V2 V3 V5 E1

Everything under all of these tabs would also be parts of the class.

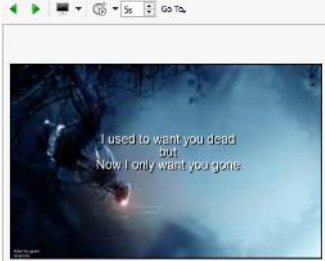

All songs have a title, and alternate title, lyrics, and things like verses, choruses. All of these could be listed as part of a song's class.

Verse: V1
Words: String

This is all a string, inside the verse, which is part of a class.

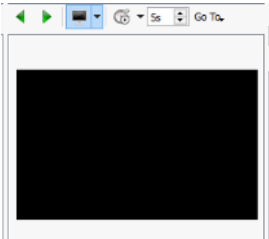

Another feature of Open LP that's important to me is this ability...

Full view

Partial view

No view.

Can you see what I did?

It's easy to change what people can see...just background, words, or no background.

```

The reason the ip address is important is...

This page.
This is the stage screen. It's wirelessly connected to Open LP via the baby network open LP generates. To find it, both computers have to be connected to the same network (internet access is irrelevant). Just open an internet browser and type in this thing:
Remote URL: <http://192.168.1.125:80/>
Stage view URL: <http://192.168.1.125:80/stage>
This is super important.

One important note about open LP is that if any network changes are made, Open LP has to be restarted. Even if it acknowledges the change, it is still EXTREMELY prone to glitches and unannounced failures upon the lack of a restart.
